

RSV GOLD-II: FIRST PATIENTS INCLUDED

The first global RSV mortality registry

We are happy to share good news with you: this week we have included more than 15 cases in our RSV GOLD database! This marks the beginning of RSV GOLD-II, a global mortality registry for children who have died from RSV infection. Today we are one step further in our mission to improve knowledge of RSV epidemiology and to develop safe and effective therapeutic and preventive interventions.

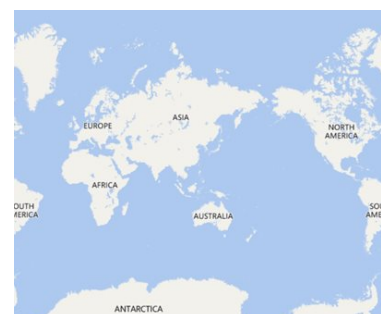

We would like to thank Dr. Daniel Noyola from Universidad Autónoma de San Luis Potosí, Mexico and Dr. Veena Kumar from MedImmune, USA for sharing these cases with us.

In the coming months we look forward to further steps in this same direction as we embark on new collaborations and encourage further contributions from researchers, physicians and other stakeholders to our registry.

Thank you and best wishes on behalf of the RSV GOLD-II team,

Leyla Kragten-Tabatabaie
Natalie Mazur

Coming soon: The RSV GOLD Dashboard will give an up-to-date overview of the data shared by all collaborators.

Colofon

The RSV GOLD-II Newsletter aims to inform all participants, involved parties and those interested in the RSV GOLD project about recent developments. It will give an update every three months on the RSV GOLD-II project. If you want to be removed from or add others to the mailing list please let us know.

If you have any questions about this project or if you are interested and willing to share data with us, please do not hesitate to contact us.
